Career Objectives

Computer Science Engineering student with hands-on experience in **HTML, CSS, JavaScript, Java, PostgreSQL, AWS**, and **Generative AI** applications. Passionate about Machine Learning, Generative AI (**LLMs and RAGs**), and Cloud Technologies (**AWS**). Seeking to develop intelligent AI-powered solutions through Machine Learning and LLM-based applications.

Education

B.E. Computer Science and Engineering , Rathinam Technical Campus	2023 – 2027 Coimbatore
• CGPA: 7.6 (Current)	
Higher Secondary Education , SMBM Matric Higher Secondary School	2021 – 2023 Dindigul
• Percentage: 83.5%	
SSLC , SMBM Matric Higher Secondary School	2020 – 2021 Dindigul
• Percentage: 100	

Technical Skills

Frontend Development

- HTML
- CSS
- JavaScript

Cloud & DevOps

AWS (EC2, S3, IAM, Lambda, API GATEWAY), Docker, Kubernetes, Git, GitHub

Backend Development

Java

Database

PostgreSQL

Generative AI

- Large Language Model (LLM)
 - Retrieval-Augmented Generation (RAG)
- Frameworks
- Prompt Engineering

Machine Learning

Supervised Machine Learning

Other Tools and Platforms

- GIT / GITHUB
- Adobe Premiere Pro
- Adobe Photoshop
- Adobe After Effects

Projects Experience

Smart Tourist Assistant, Tools & Technologies: HTML, CSS, JavaScript, Python, AI, Machine Learning

- Developed an AI-powered Smart Tourist Assistant for location-based travel guidance and nearby service recommendations.
- Integrated real-time location tracking to suggest hotels, restaurants, petrol bunks, and tourist places dynamically.
- Built using Full Stack and AI concepts to provide an interactive and user-friendly travel assistance system.

AI Code Review GitHub Action for C#, Tools & Technologies: GitHub Actions, YAML, C#, CI/CD Automation

- Engineered a CI/CD workflow via GitHub Actions to automate C# code reviews and static checks on all Pull Requests.
- Enforced branch protection rules that automatically block code merges failing syntax or security validations.

Trimly (URL Shortener), Tools & Technologies: React.js, Tailwind CSS, Node.js, Express.js, Qrcode.react, Git/Github

- Utilized high-speed In-Memory Storage (JavaScript Map) instead of a traditional database for URL mapping and code storage.
- Integrated qrcode.react for client-side dynamic QR code generation of shortened links.
- Designed a zero-database history log using browser LocalStorage to persist and display user-created links locally across sessions without account creation.

Certification

- Global Certification on AWS Certified Cloud Practitioner
- Supervised Machine Learning Course - Scalar Topics
- Building RAG Apps Using MongoDB

Soft Skills

- Adaptability
- Good Teamwork
- Time Management
- Communication

Languages

- Tamil
- English
